Mr. Clarence W. Nichols  
Office of International Commodities  
Bureau of Economic Affairs  
Room 3527 New State  
Department of State  
Washington, D. C.

Dear Nick:

Enclosed are two copies of the 1965 edition of our Economic Intelligence Statistical Handbook.

The Handbook is basically a compilation of essential economic statistics on the Communist countries. However, it also provides comparative statistics on Free World countries, particularly when these Free World countries are important producers of individual commodities. This year new tables have been included on United States, United Kingdom, West Germany, Japan, Italy and France. As in the past, data have been drawn from unclassified sources wherever possible to increase the utility of the Handbook.

Should you desire additional copies, we shall be pleased to furnish them.

Sincerely yours,
